

Chemical industry:

- non-pressure and pressure technological tanks,
- mechanical devices included in technological installations,

Paper industry and wood and farm waste processing:

- preparation and supervision over repairs of mechanical devices,
- design and construction of ash transport installations,
- design and manufacture of anti-odor filters,
- manufacturing and delivery of spare parts,
- modernization projects for technological installations,

Industry of machines and devices:

- comprehensive design of components and machine parts,
- workshop execution and delivery of machine and device elements as well as installations,
- reconstruction and modernization repairs of devices and installations.

We have experience in the implementation and coordination of projects (turnkey) in cooperation with contractors from other industries, e.g.

- I&C,
- Electric - with permissions,
- Construction - with permissions,
- Pressure,
- Production placement with the author's / engineering supervision of the elements' execution in the production workshop.
